EXAMINER'S REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest or claim a multilayer polyester film wherein: (1) the outer layer consists essentially of a copolyester containing 91-97 wt% PEN units and 3-9 wt% ethylene terephthalate units, and having the stated relationship of Tg values between layers (claim 1); or (2) the outer layer contains the recited copolyester having 91-97 wt% PEN units, and having the stated relationship Tg values between layers and interlayer adhesion (claim 5). The patents and copending Applications of record fail to specifically disclose or claim films having a maximum PEN content of 97 wt% or less in view of the showing in the specification with regard to comparative films containing 100 wt% PEN.

Since no other rejections except a provisional double patenting rejection would be present, and since Application 10/117,619 (still pending) has a later filing date than the present application, the present application is allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
